luks

Mister Luks guide

How Mister Luks works

He's Luks's WhatsApp number. Add him to your group, send receipts like you always do, and he logs them: how much each person paid, each person's share and who pays whom.

Save him as a contact

+57 333 762 7471

He shows up as “Mister Luks”.

Scan it with your phone camera

1 What is Mister Luks?

One more contact in the group, except he keeps the books. He reads receipt photos, PDFs and messages with amounts, and turns them into expenses on mrluks.com, split among the group.

He logs quietly: he doesn’t flood the group and only writes when you ask him. Nobody else has to install anything.

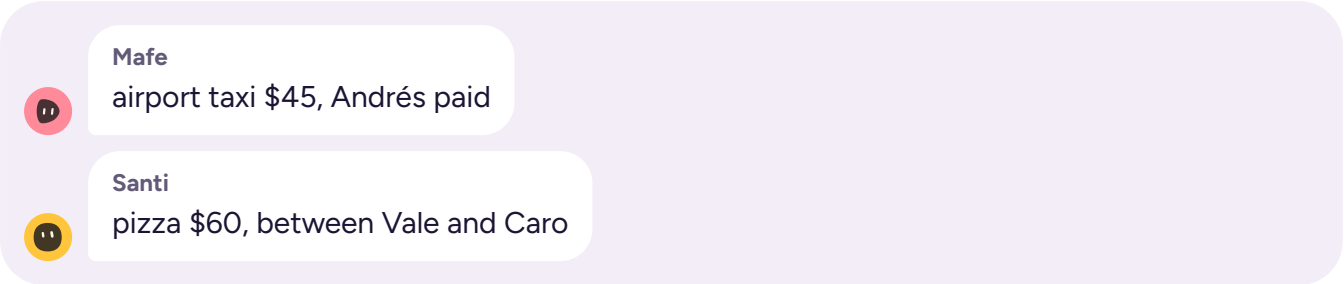

2 Add him to the group

- Save the number as a contact and add him to the group like anyone else.
- Can't add him? Send him the group link in a private chat (**Group info** → **Invite via link**) and he joins on his own.
- **Just one person** in the group signs up at mrluks.com and connects the group. Everyone else does nothing: they join the account with their WhatsApp name.

Group can't take anyone else? On mrluks.com you can also link your own WhatsApp, like WhatsApp Web: Luks reads the group from there without adding anyone.

3 Send your expenses

- A photo of the receipt, or the invoice as a PDF.
- Or typed: **“taxi $45”**, **“groceries $120.50”**.
- Several things in one message get added up: **“ice $8, sodas $12”**.
- Someone else paid? **“Andrés paid”**.
- Not for everyone? **“between Vale and Caro”**.

Mister Luks doesn’t reply to every expense: you see it logged on mrluks.com. If a group wants confirmations, an admin turns them on in Connect WhatsApp.

4 Ask him

- Type @ and pick Mister Luks: **“@Mister Luks how much so far”**, **“who owes whom”** or **“how much do I owe”**.
- Group questions get answered right there. For your own (“how much do I owe”, “my expenses”) he asks whether you want it in private or there, and remembers.
- To change it: **“@Mister Luks send it in private”** or **“@Mister Luks tell me here”**.

5 Fix things by replying to the expense message Soon

- Press and hold the expense message (the photo, PDF or text), tap Reply, mention Mister Luks and type **“Andrés paid”**, **“between Vale and Caro”** or **“delete”**.
- To delete, he asks for a “yes”. Whoever sent the receipt or an account admin can make fixes.
- You can also fix everything on mrluks.com.

6 Log from when?

When the group is connected, Mister Luks asks: “1 From now on · 2 The whole chat”. Anyone in the group can answer, and you can change it later:

“@Mister Luks from now on” or **“@Mister Luks read everything”**.

Mister Luks can't read what was sent before he was added. To bring it in, export the chat and send him the .zip (in private or in the group), or upload it on mrluks.com. Meanwhile, he logs what's new.

- Android: ⋮ → **More** → **Export chat** → **Include media**.
- iPhone: **group name** → **Export Chat** → **Attach Media**.

7 Tips

- No “view once” photos: Mister Luks can’t open them.
- Sharp, straight photos with the total in view.
- PDFs up to 6 MB.
- If only admins can send messages in the group, Mister Luks still reads it, but he has to be an admin to reply.

8 Privacy

- Mister Luks only keeps what looks like an expense: photos, PDFs and messages with amounts. The group chatter never leaves WhatsApp.
- Only the people in the account see the expenses.
- Rather not be counted? Type **“@Mister Luks don’t count me”**: from then on he stops logging what you send (what’s already there stays the same). To come back, **“@Mister Luks count me again”**.
- You can delete your user and your data anytime from your profile on mrluks.com.

Questions? Send Mister Luks **“help”** and he sends you this guide.
